## Versatile engine compressors for remote applications

The freedom to do what you want, when you want, wherever you want. To be independent under all circumstances. Who wouldn't like that? As a small building contractor or a larger construction company, if you are in harvesting business or a farmer; this is your tool.

You'll be excited about this: a range of unplugged diesel and petrol engine belt driven compressors that are easy to move, that can cope with different air demands, that can power multiple tools at the same time and simultaneously provide a steady air flow; the BlengineAIR range comprises a two-in-one solution that can provide you with both air and electricity in remote locations.

With these versatile engine compressors you are totally independent from energy sources, giving you total availability of compressed air in all circumstances. Giving you total freedom.

## Petrol Engine

Supersilenced version  
Worldwide service support

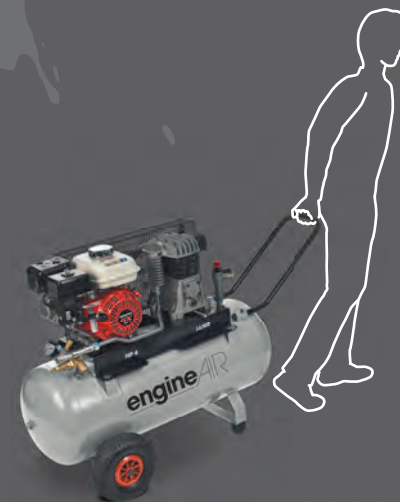

### Metal Rollbar

Offers full protection.  
Easy to carry, easy to move

### Twin tank version:

**3 connections for 2 pressures and 1 big flow**  
Inbuilt connection flexibility for different demands

### Ergonomic handle and large pneumatic tyres

For easy movement over difficult terrain

### Easy to install for any kind of application

Pre-installed: just connect to a vessel and you are ready to go

## Diesel Engine

Low fuel consumption

### Anti-vibrating pads

Less vibrations, lower noise level and increased life time of your outside buddy

### Easy maintenance

Led control panel, oil pressure and battery recharge indicator

## Bi-Energy

*The two-in-one solution with small footprint*

One powerful motor, supplying both air and energy. Generator with electricity plug at 230 volt

2.2 kva (max)
